

Hyrum State Park Collection
Museum Collection 10 P04
Accession # 2014.3
Collection Overview

Collection Date Range: 1960 to 2010?

Processed by: Samuel Parr and Jami Van Huss

Finding aid written by: Samuel Parr and Elisabeth Cropper

Finding aid updated by: Elisabeth Cropper, August 2017

Extent: 9 boxes, 4.5 linear feet

Physical location: Hyrum City Museum Archival Storage Room

Provenance Note

The Hyrum State Park Collection was donated by Hyrum State Park in 2013. Museum staff members were pursuing knowledge concerning the park in for the completion of the exhibit, *The Hyrum Dam: Building a Dam, Building a Community* when the park rangers discovered a miscellaneous box of historical materials and offered it to the museum on a loan. In 2014 it was accessioned into the museum's permanent collection.

Historical Note

The Hyrum Dam was built during the 1920s and 1930s by the Bureau of Reclamation and Works Progress Administration in order to store water from the Little Bear River. Though the dam's main purpose was irrigation, the site quickly became a place of recreation for Cache Valley residents who, together with Hyrum City, Cache Chamber of Commerce, and Hyrum Lions flattened the beaches and got rid of drop-offs to make the spot more accessible to the community. Swimming, boating, ice skating, and picnics on the beach have long been popular activities, and on July 4th many Cache Valley residents came to the dam to see the fireworks sparkle over the water.

Over time, the South Cache Water Users Association began to worry about safety issues at the reservoir and wanted a local organization to take charge and regulate recreational activities. A committee of representatives from Hyrum drafted a proposal for this to the Utah State Parks Department, and in 1959, the Utah State Parks and Recreation Commission turned Hyrum reservoir into a state park.

Scope and Content of Collection

This collection contains photographs and negatives of photographs taken of recreational activities at Hyrum State Park. The photos were taken sometime between 1960 and 2013, when the collection was discovered by park rangers and donated to the museum.
